PROFESSIONAL SUMMARY

Final-year Computer Science and Design student specializing in the MERN stack. Proven ability to build responsive, dynamic user interfaces with React.js and architect scalable backend services using Node.js, Express, and REST APIs. Experienced in efficient data handling and database management with MongoDB. Brings advanced problem-solving skills honed through interactive 3D web optimization to deliver high-performance, full-stack web applications.

EDUCATION

B.E Computer Science and Design
SNS College of Engineering
CGPA: 8.35

2023 – 2027
Coimbatore

PROFESSIONAL EXPERIENCE

Web Development Intern – Betroid | Jun 2024 – Aug 2024

- Built and deployed a responsive web portfolio using HTML, CSS, and JavaScript on GitHub Pages.
- Ensured cross-device accessibility and clean code standards using Git version control.

Game Development Intern – Lets Gametech | Dec 2023 – Feb 2024

- Developed game mechanics and AI logic using C# in Unity for a mobile game project.
- Optimized UI/UX components to improve player engagement and interface usability.

SKILLS

Frontend Development:

- React.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Responsive & Dynamic UIs

Database & Optimization:

- MongoDB, Efficient Data Handling, Performance Optimization (GLB/Draco)

Backend & APIs:

- Node.js, Express.js, REST API Development

Version Control & Tools:

- Git, GitHub, Vercel, Render

Interactive UI:

- Three.js, React Three Fiber (R3F), WebGL, Blender

PROJECTS

Stefan's Seafood – Full Stack E-commerce | Feb 2026 | React · Node.js · MongoDB · Vercel 🔗

- Developed a production-ready e-commerce platform featuring real-time inventory, secure Admin CRUD controls, and WhatsApp order routing

Interactive 3D Portfolio Website | March 2026 | React Three Fiber · Blender · Three.js · Vercel 🔗

- Engineered a highly optimized 3D web experience featuring custom Blender assets and interactive, hover-triggered camera animations.

Samsung 3D E-Commerce Showcase & AI Assistant | Jun 2026 🔗

- Built a full-stack 3D e-commerce showcase (MERN, Redux, Tailwind) integrating an AI chatbot to facilitate dynamic product discovery, feature explanations, and automated support.

3D Product & Environment Modeling | Jun 2025 🔗

- Executed the complete 3D pipeline in Blender to design, texture, and optimize realistic architectural and product assets for digital web environments.
